

HRP Goat Anti-Mouse Recombinant Secondary Antibody

Cat: HKS23207 Company: Haokebio

Organism: Goat Applications: ELISA:1:3000-1:10000

Species reactivity: Mouse WB:1:3000-1:10000

Store at -20 °C for one year.

Background:

HKS23207 targets Mouse IgG (H+L) in ELISA a nd Western blot. It can bind to all mouse IgG iso types, mouse IgM and IgA as well as rat IgG. It s hows minimal reactivity for rabbit, human, pig a nd bovine IgGs.Recombinant Secondary Antibod ies are mixtures of precisely engineered recombi nant monoclonal antibodies that recognize multip le complementary epitopes on the same IgG. Eac h recombinant clone in the final multiclonal mixt ure is carefully selected after rigorous characteri zation and screening to ensure the highest level o f performance. The selected clones are mixed in various combinations, each of which is then func tionally characterized in multiple applications to select the final multiclonal mixture with optimal performance. Each lot of Multi-rAb™ Secondary Antibodies is produced by mixing the same high performing recombinant clones every time to ens ure that they have high batch-to-batch consistenc y, which in turn results in high reproducibility of experimental data.

RRID:

AB_3068333

Clonality:

Multiclonal recombinant

Purity:

The antibody was purified from culture media su pernatant by immunoaffinity chromatography usi ng Protein G beads.

Form:

Liquid

Storage Buffer:

PBS with 50% glycerol, 10 mg/mL BSA, 0.1% P roclin-300, pH 7.4.

Storage:

Note:

This product is for research use only, not for diagnostic or the rapeutic use.

Images:

HRP-Goat Anti-Mouse Recombinant Secondary Antibody (H+L) was used at 1:5000 for detection.

Source of Reagents:

发表[中文论文]请标注:HRP Goat Anti-Mouse(HKS23207) 由杭州浩克生物技术有限公司提供;

发表[英文论文]请标注:HRP Goat Anti-Mouse(HKS23207) were kindly provided by Hangzhou Haoke Biotechnology Co., Ltd.

For research use only. Not for use in diagnostic procedures.
